

# Drug and Health Screening

**ProVerify™'s drug and alcohol screening solutions are designed to meet your company's objectives, regulations, and drug-free workplace requirements for health, safety, and fitness standards.**

Whether it is for pre-employment, random employee screening, post-accident, or DOT compliance, we have a solution for you!

**ProVerify's drug and health screening network includes more than 25,000 locations nationwide.**

We offer easy, online access to the results and report them along with your background search information with real-time monitoring.

We offer drug screening collection methods including urinalysis, oral swab, hair follicle and blood test which can be screened against 5, 9, and 10 Non-DOT and 5 DOT drug panels.

When your company partners with ProVerify™ you will have

access to our team of highly trained program specialists. Our staff will assist your organization in developing a customized screening solution, provide friendly customer service and technical support, as well as system training and program implementation. Our goal is to provide a screening solution tailored to specific industry requirements and your company's objectives. We invite you to contact us to learn more about how we can assist your company.
