

Solutions for Every Industry

Healthcare Industry

Our services include the following lists:

- OIG - Office of Inspector General
- GSA - U.S. General Services Administration
- FDA - Food and Drug Administration
- DEA - Drug Enforcement Administration
- Tri-Care - Military Insurance
- 19-State Medicare List
- State Attorney General's Report
- All 50 State License Board Actions

We provide on-going monitoring with verification of possible and probable matches with a system that updates several times daily.

Due to the new and stricter laws set forth by states' Departments of Health/ Public Welfare, Application Verification provides services to screen employees who are working in the healthcare fields. When the State of Pennsylvania Department of Public Welfare issued Bulletin 99-11-05 on August 15, 2011, Application Verification's team created a set of services to ease the pain felt by these companies.

Due to the mandatory monthly screening of all employees, who are either in business or are doing business with healthcare facilities, Application Verification's Medicare Exclusion service is more comprehensive than just a simple check of the Office of Inspector General's Excluded Parties List, the General Services Administration's Excluded Parties List, and the State's Medi-check list.

Your company can experience a partnership with Application Verification's highly trained program specialists. Our staff will assist in developing a customized screening solution, providing friendly customer service and technical support, as well as system training and program implementation with your organization. Our goal is to provide a screening solution tailored to specific industry requirements and your company's organizational objectives. We invite you to contact us today!
